

# VERIZON WITH INVUE

## INSTALLATION

### BACKGROUND

With technology improving and information becoming more readily available, security is becoming a major focus in stores such as Verizon Wireless. Beam team was hired by Invue, a security device company that provides in-store visibility and proven customer engagement for many wireless telecommunication providers. Invue's products were to be installed throughout the Verizon store, and Beam Team was hired to complete the work.

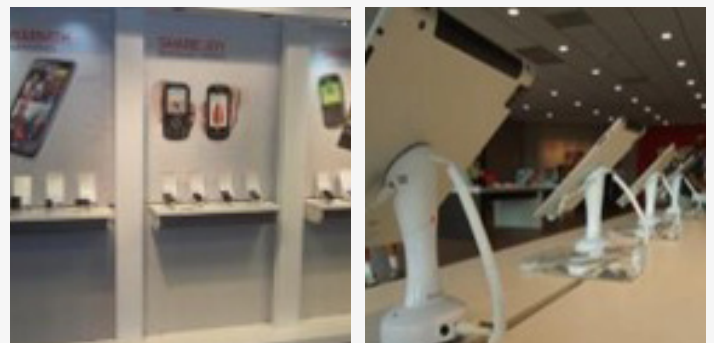

AS SECURITY RISES TO THE FOREFRONT, INVUE PARTERS WITH THE BEAM TEAM TO HELP VERIZON STORES GET OUTFITTED WITH NEW TECHNOLOGY.

### THE OPPORTUNITY

Beam Team mobilized their team during the night to replace old security systems as an effort to avoid interacting with customers and disrupting Verizon's flow of business. The first step was to unload, inventory, organize, and break down the old system. The second step was to execute the project, through installing the new security devices as well as test the new Invue product system.

### THE SOLUTION

With work crews ranging from 5 to 10 experienced installation contractors, Beam Team installed the security devices in 1,700 different locations nationwide. Our Team successfully completed each job to the clients expectations by providing them with a team of professionals who were proactive, honorable team players that showed creativity, took ownership, and remained customer focused.

Security at retail is on the rise. InVue engaged The Beam Team to install its new state-of-the-art systems at Verizon stores.
